GENEVALAB.COM

“A chic Swiss statement that puts itself on a pedestal so you don’t have to...sound quality is rich and detailed and can easily fill a large room.”

Sunday Telegraph 17th August 2008

## Introducing sound simplicity with Geneva's gorgeous single-box sound systems

From Switzerland, Geneva Lab is revolutionising home audio by making great sound easy to enjoy. In the place of component stacks, speakers and metres of cable is the amazing Geneva Sound System: a beautifully stylish hi-fidelity music system in a single lustrous cabinet.

Available in a choice of four sizes and in walnut\* or white, red and black lacquered colours, it offers an optimised easy-to-use entertainment experience anywhere in the home. Each Geneva Sound System has comprehensive iPod® connectivity, a built-in low distortion CD player and a digital FM radio tuner with external antenna for superior signal capture. Simply insert a CD, select your favourite radio station or place your iPod in the dock to experience a deep, wide and exceptionally detailed sound. Navigate iPod menus, select CD tracks, radio stations and inputs in comfort by using the slim handset provided. Separate line level inputs enable TV audio, computers and even games consoles to be connected and enjoyed with equal precision and impact.

By blending proprietary digital audio technology with enough power to fill even the largest rooms, Geneva's engineers have created a complete audio system that generates the fidelity and presence of a big hi-fi from a uniquely compact design that's easy to live with and to love.

## Pure Embracing Sound

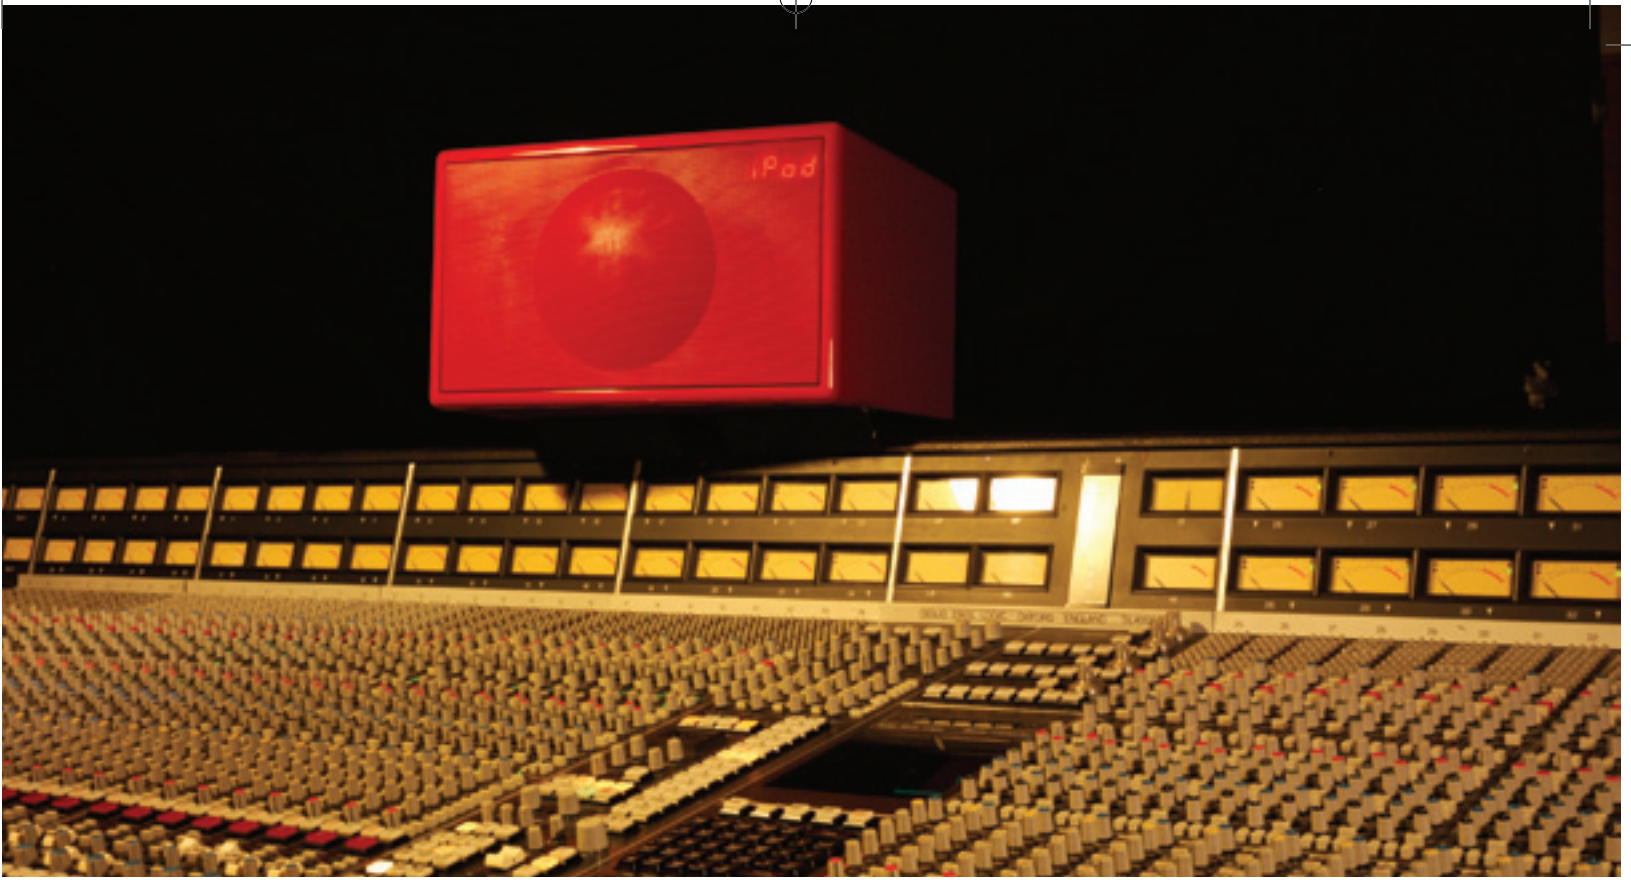

Beneath the Geneva Sound System's ultra-chic styling resides a powerfully sophisticated technical design. It utilises an innovation called EmbracingSound™ to create an amazing 3D audio 'sweet spot', which allows every listener the best seat in the house.

The system's patented digital signal processor sends the sound through specially aligned speaker arrays within the Geneva cabinet to reproduce a solid stereo effect over a much wider area than conventional stereo. EmbracingSound technology saves you the hassle of researching, purchasing and locating a bulky combination of audio components and speakers in a room by giving you the spatial experience of stereo in all positions from a single box.

Equipped with as many as seven high performance drivers powered by up to 700 watts of ultra-efficient amplification (Model XXL), the system is optimised to deliver a truly wide frequency range coupled with a wonderfully rhythmic and naturally dynamic response. This is why Geneva Sound Systems compare favourably with multi-component set ups costing many times more.

Some of the most influential and respected musicians and engineers have come to rely on EmbracingSound technology:

“EmbracingSound is an irreplaceable part of my monitoring set up.”

**Michael Beinhorn**

Producer, Musician

Fuel, Korn, Marilyn Manson, Ozzy Osbourne, Soundgarden, The Red Hot Chili Peppers, Herbie Hancock.

“I had worked on a song for about 20 minutes when, all of a sudden, I realised that my old speakers were not even connected. With this superb definition and depth of sound image, it totally blew my mind.”

**David Foster**

Producer, Songwriter, Musician.

Donna Summer, Julio Iglesias, Lionel Richie, Natalie Cole, Dionne Warwick, Olivia Newton-John, Al Jarreau, Celine Dion, The Corrs, Whitney Houston, N'Sync, Toni Braxton.

“EmbracingSound makes the total sound from the movie reach the listener’s senses the way the director intended when we made the movie. It is like being in the theatre even though there is only one single box playing!”

**Per Hallberg**

Supervising Sound Designer, Soundelux Hollywood.

Black Hawk Down, Gladiator, Seabiscuit, Heat, Braveheart, Tarzan, Legends of the Fall, Devil's Advocate, Face Off, Last of the Mohicans.

“With EmbracingSound I’m able to capture the richness and soulfulness the music deserves.”

**Narada Michael Walden**

Producer, Songwriter, Musician, Artist.

Whitney Huston, Aretha Franklin, Mariah Carrey, Gladys Knight.

## MODEL **XXL**

The largest Geneva system, Model XXL houses an entire home cinema and music system and also provides storage for your DVD or Blu-ray player, satellite box and games console in a single white or black gloss lacquered cabinet. The cabinet will co-ordinate with and supports a Plasma or LCD screen up to 65" in size.  
(screen not supplied)

 AC power cable  
 External FM wire antenna  
 Soft polishing cloth

“What might be a surprise is how articulate, detailed and dynamic it is...this is one of the best sounding docks money can buy.”

Stuff magazine Feb 2009

“It’s hard to overstate the sheer, balls-out power of this joyously over-sized, high-end iPod dock.”

T3 magazine, 2009 ‘Hot 100’ product

GENEVA

“The Geneva offers a perfectly balanced set of serious audio components in a single lustrous lacquered wood cabinet...the sound has a width normally only available with separate left and right speakers and also spreads itself throughout the room, so you don't have to be seated in a narrow sound corridor to appreciate it.”

[Financial Times 'How To Spend It' supplement](#) 18th October 2008
