

# Light Fantastic

**Rako, the UK's most innovative lighting specialist has come up with a brilliant alternative to the cost and hassle of re-wiring: a flexible, scalable and totally wireless lighting control system for your entire home.**

Unlike the switches and dimmers of a conventional wired system, Rako's on-wall control pads and remote handset link wirelessly with dimming modules that can be installed within existing lighting circuits to introduce powerful lighting design to every room while leaving the décor untouched.

When versatile lighting design is this easy to install and control, you'll wonder how you ever lived without it.
